

**SIEGENIA** Innovations for you:

# PORTAL PS/PSK comfort

## Your benefits<sup>3</sup>:

- ❶ Intuitive and convenient operation with a high standard of ease of use
- ❷ Quiet and smooth running
- ❸ Flexible product programme design

Our products and solutions bring spaces to life and give people a sense of well-being: [www.raumkomfort.com/en](http://www.raumkomfort.com/en).

Window systems

Door systems

Comfort systems

Almost as  
if by magic.

### This newcomer shows its strengths: PORTAL PS/PSK comfort.

It is suitable for parallel sliding and parallel tilt & slide systems made of timber, timber-aluminium, PVC and aluminium. PORTAL PS/PSK comfort combines intuitive operation with smooth and fluid running of the sash into or out of the locking position. This gives end users a maximum degree of room comfort. This effect is achieved by the optimised kinematic mechanism at the top and bottom side of the sash, which ensures a quiet and smooth running performance. At the same time, the new slider connection and effective rebate brakes from SIEGENIA almost completely prevent the sash from swinging back when retracting and extending. This makes opening and closing easy and protects the sash. The new hardware always makes a good impression: Its appealing cover caps give the element a fresh, contemporary look.

#### **Adaptable and economical**

For fabricators, the systematic further development of the PORTAL PSK stands for cost-effective production and tailor-made solutions for a wide variety of sash weights. This is made possible by its ingenious modular system that enables flexible adaptation to the widest range of price and comfort requirements. And sash assembly could not be easier. This is made possible by factors including the practical height and tilt adjustment feature and the ability to mount the sash in the running rail with ease.

Intuitive and  
smooth.

### Benefits for fabricators

- Sash weights up to 200 kg can be achieved
- Sash widths up to 2,000 mm and sash heights up to 2,800 mm can be achieved
- Fabrication is optimised due to the use of the standard turn and tilt hardware for the central lock
- Operation is easy to explain
- Mutually compatible basic and premium equipment for a customised offer
- Flexible adjustment possibilities (height and tilt adjustment)
- Simple installation of the sash (anti-lift device)
- Intuitive operation and damping of the end positions protect the element

### Benefits for architects and end users

- Easy and convenient operation, supported by several smart comfort components and synergetic effects
- Outstanding ease of operation
- Quiet, smooth running performance
- Sash swings smoothly when opening and closing
- Sturdy and safe to use
- High compression – as there is no break in the perimeter seal
- Contemporary cover cap design
- Burglar resistance up to resistance class RC2 (timber, PVC)

Intuitive and convenient to operate.

The new design of PORTAL PS/PSK comfort takes ease of use to a whole new level whilst also focusing on simple and secure sash assembly.

THE DECOUPLED CONTROL  
ARM ON THE BOGIE WHEELS  
ENSURES GENTLE  
CLOSING OF THE SASH

ADDITIONAL BRAKE  
DAMPENS THE SASH  
WHEN CLOSING AND  
MINIMISES OVERSHOOT
