Door systems

Comfort systems

ALU axxent PLUS concealed hinge side.

SIEGENIA offers the perfect solution for design-oriented room concepts with the new ALU axxent PLUS. All hardware components are integrated in the window profile and fully concealed. Window profiles can be reduced further and glass areas enlarged thanks to the innovative technology.

Large and heavy window elements can move safely and consistently due to its high load capacity. Supplemented by the ALU GLOBE RR design-led handle, the window design is reduced to the bare essentials.

By offering optional upgrades to the highest resistance classes, SIEGENIA makes a significant contribution to the topic of room comfort in terms of security as well.

Set an invisible axxent.

Benefits for fabricators

- A high level of pre-assembly facilitates installation of the ALU axxent PLUS
- The optimised mounting technology enhances fabrication on the window
- A high load capacity of up to 150 kg without additional load-bearing rods creates lasting safety of application
- The 3D adjustability supports the installation of the window elements in the building
- Also suitable for extremely narrow window widths of only 210 mm in turn-only sashes and 380 mm in turn-and-tilt sashes

Benefits for architects and end users

- Fully concealed hardware components enable reduction to the bare essentials
- The ALU GLOBE RR design-led handle without the rose supports the clean design and also ensures outstanding ease of use
- The high load-bearing capacity creates high reserves and supports safe operation throughout the entire life of the window
- Especially narrow visible profile widths ensure an increased glass content and not only bring an airy visual effect but also more light into the house
- Fully concealed hardware components provide maximum design flexibility in terms of the colour of the window
- Anti-corrosive materials ensure a sustainably protected surface and the greatest resistance to aggressive ambient conditions
