

SIEGENIA Innovations for you:

DRIVE axxent DK

Our benefits³:

- ➊ Motor function for tilt and turn-and-tilt windows, two-in-one: motorised locking, unlocking and tilting with just one drive
- ➋ Fully concealed technology for elegant, classical window design
- ➌ Integrated 10-minute ventilation timer

Fully concealed tilt locking drive.

The invisible two-in-one DRIVE axxent DK drive makes it possible to move windows and even hard-to-reach skylights. Completely integrated into the frame profile, it enables fully automated, controlled window ventilation. The universally applicable drive can tilt, lock and unlock the window. A handle is not needed to tilt or open the window. The window can also be closed from the tilt or turning position manually without a handle at any time and locked.

The fully concealed technology combines perfect design with maximum room comfort. This means that the windows can be easily and thoroughly cleaned, which is a further plus point for sensitive locations such as senior citizen care homes and hospitals. In high-class residential and commercial properties, it increases both the quality of living and the property value. The convenient control of the drive is accomplished via push button, the SIEGENIA Comfort app (optional) or via the building automation.

DRIVE axxent DK: Moving Design.

Benefits for fabricators

- Suitable for tilt and turn-and-tilt windows made of timber, PVC and aluminium
- Two-in-one drive: no installation costs for additional locking drive
- No installation costs for cable transfer, easily installed and can be readjusted after installation
- Can be used for turn-and-tilt windows made of PVC with an airgap of 12 +1 mm, timber windows with an airgap of 12 +1 mm for rebate widths of 30 mm upwards and aluminium windows with a eurogroove and a chamber dimension of 21 +1 mm
- Opening width: 120 or 150 mm depending on the version
- Closing speed meets applicable safety requirements
- For residential and commercial buildings

Benefits for end users

- Fully concealed technology: windows easy to clean
- Motorised locking, unlocking and tilting – window handle not required
- Can be operated by a button, the SIEGENIA Comfort app or via the building automation
- Especially smooth-running in whisper mode (only with the SIEGENIA Comfort app)
- Can be operated manually even from the motorised tilt and locking position
- Automatic ventilation due to integrated 10-minute timer or in combination with the SENSOAIR CO₂-VOC sensor
- Increase in the value of the property
