TITAN AF E-Look special finish.

A coastal climate creates special demands - including, of course, in terms of hardware quality. Therefore our TITAN AF E-Look consists of high-quality materials and a first class zinc-nickel coating. This not only offers extremely effective corrosion protection against general environmental influences, but also protection against the stresses of extreme climate and weather conditions, e.g. salty sea air.

Whether it be in an exclusive residential building or close to the coast: The resistant and high-quality stainless-steel, special finish of the TITAN AF ensures minimal wear, lasting functional reliability and a long lasting beautiful appearance. This will save you and your customers from some nasty surprises and complaints.

Maximum quality
and durability!

Benefits for fabricators

- Special hardware finish for timber and timber-aluminium windows, as well as for PVC profiles
- Solution for demanding areas such as coastal areas and regions with a high air humidity
- Zinc-nickel coating for lasting hardware protection to prevent any abrasion, which would occur with painted surfaces
- Exceeds the standard requirements of the highest corrosion protection class DIN EN 1670 (> Class 5 = 480 h) threefold
- The same assembly instructions as for the TITAN Silver standard finish of TITAN AF
- Long-term, positive experience
- Elements possible up to RC2

Benefits for end users

- Protection against salty air and can be used near to the coast
- Increased corrosion protection
- Durability and minimum amount of wear
- Scratch-resistant, water and dirt repellent to a high extent
- Resistant surface coating with "self-healing" in case of minor scratches
- Durable functional reliability
- Long-term, elegant, grey-matt stainless steel appearance
